SUMMARY

Computer Science Engineering student with hands-on experience in Python, Machine Learning, Deep Learning, SQL, and data preprocessing. Strong foundation in machine learning concepts, data analysis, and problem-solving, with practical experience in developing data-driven solutions and applying model explainability techniques. Eager to apply technical and analytical skills to real-world technology and healthcare challenges.

EDUCATION

B.Tech. Computer Science and Engineering <i>Amrita Vishwa Vidyapeetham</i> CGPA:7.36	2023 – 2027 Amritapuri, Kerala
Higher Secondary Education <i>Sri vasavi Junior College</i> 93.8%	2021 – 2023 Andhra Pradesh
Secondary Education <i>Alpha High School</i> 100%	2020 – 2021 Andhra Pradesh

PROJECTS

QoE Prediction and Priority-Based Resource Allocation for Video Conferencing • Developing an LSTM-based model to predict future Quality of Experience (QoE) and Mean Opinion Score (MOS) from WebRTC network and media performance metrics. • Collecting and analyzing RTT, jitter, packet loss, bandwidth, bitrate, frame rate, and frame drops to identify factors affecting video conferencing quality. • Applying SHAP-based explainability to analyze feature contributions and designing priority-based resource allocation according to predicted QoE and content importance.	2026 – Present
E-Commerce Data Engineering Pipeline • Built an end-to-end ETL pipeline using Python and Pandas to extract, clean, validate, transform, and load e-commerce transaction data into a normalized MySQL database. • Designed relational schemas for customers, products, orders, and order items with primary/foreign keys and data-quality checks for duplicates, missing values, and invalid records. • Developed advanced SQL queries using joins, CTEs, subqueries, aggregations, and window functions for revenue analysis, customer ranking, product performance, and sales trends.	2025 – 2026
NetPulse– Real-Time Network Monitoring & Analytics Platform • Developing a network monitoring platform to collect and analyze bandwidth, latency, jitter, packet loss, and throughput metrics for performance monitoring. • Building interactive dashboards using React and integrating REST APIs with a SQL database for storing and querying historical network performance data. • Implementing threshold-based alerts and historical analysis to identify network degradation and support proactive troubleshooting.	2025 – 2026

SKILLS

Programming Languages Python, Java	Libraries Pandas, NumPy
Machine Learning Basic ML Concepts, Regression, Classification, Decision Trees, Random Forest, Model Evaluation	Database & Core Concept SQL, Object-Oriented Programming (OOP), Data Structures and Algorithms
Deep Learning Basic Deep Learning Concepts, Neural Networks, LSTM	Web Technologies HTML5, CSS, JavaScript, React
Explainable AI SHAP	

CERTIFICATES

- 2026 | 30 Days Power BI Micro Course– SkillCourse
- 2026 | SQL Foundations– Microsoft
- 2025 | Understanding Machine Learning– DataCamp
- 2026 | Microsoft Excel– SkillCourse
- 2026 | Introduction to HTML, CSS, & JavaScript– IBM

LEADERSHIP & COMMUNITY ENGAGEMENT

The soul of India-Project Lead

Led a team and conducted cultural heritage sessions for 20+ students at Amrita Vidyalayam, Karuna gappally.

NCC Cadet– 34 Andhra Battalion

- Selected for Republic Day Camp (RDC) 2022 under Guntur Group HQ, representing 34 Andhra Battalion among 500+ cadets.
- Led and participated in multiple NCC camps, including ATC 2023, developing leadership, teamwork, discipline, and physical endurance.
- Participated in Swachh Bharat Abhiyan and No Drug Campaign awareness programs and community initiatives

LANGUAGE

English, Telugu, Hindi– Fluent in reading, writing, and speaking; Urdu– Proficient in reading and speaking; Malayalam– Basic understanding
